EXPERIENCE

Twitter – iOS Software Engineer

Fall 2018 - Present | CA

- Rewrote the Twitter iOS share extension UI (which is used 700,000 times per day) to allow for 280 character tweets
- Redesigned Twitter's iOS App Store review prompt, increasing worldwide ratings from 4 stars to 4.7 stars in 4 months
- Reduced the iOS team's CI flaky test occurrences by 99% by building a test health analytics pipeline

Tesla – React Software Engineer Intern

Summer 2018 | CA

- Redesigned the shop.tesla.com homepage (which is viewed 1 million times per week) using HTML, CSS, and JavaScript
- Engineered the Tesla Model 3 comparison page using React.js, CSS, and HTML for the long-range Model 3 car launch
- Integrated the payment code for the new shop.tesla.com checkout, which processes \$140,000 in daily revenue

Twitter – iOS Software Engineer Intern

Fall 2017 | CA

- Increased the 20-character display name limit in the Twitter iPhone app, impacting 500,000+ users in under 1 week
- Developed code to enable 20+ keyboard shortcuts for the Twitter iPad app using Objective-C and Swift
- Created a new pull-to-refresh animation, winning top 5 in the company wide hackweek

Adobe – React Software Engineer Intern

Summer 2017 | UT

- Developed the first map visualization tool for Adobe Analytics Workspace using JavaScript, React, and Mapbox APIs
- Implemented a modified clustering algorithm capable of loading and rendering billions of visible location data points
- Released project to hundreds of Fortune 500 customers

Microsoft – Software Engineer Intern

Summer 2016 | WA

- Built a diagnosis tool in C# for Fortune 500 companies to troubleshoot their Windows Server deployments
- Reduced time to diagnose customers' servers from 1½ days to 15 minutes, saving \$80,000/year in support costs

EDUCATION

SOFTWARE SKILLS

Brigham Young University – Class of 2018

- B.S. Computer Science – 3.7/4.0 GPA
- National Honor Society (top 20% of class)

- **Proficient in:** Python, JavaScript, Node.js, HTML5, CSS, C#
- **Worked in:** Swift, SQL, React.js, Amazon Web Services, C++, Java, Asp.net, Git, RESTful and TCP web services
- **Interests:** Graphics, Mobile Dev, AI, UI Research

PROJECTS/HACKATHONS

Seattle Children's Hospital Tonsillectomy App – Microsoft Hackathon

Summer 2016 | WA

- Created a native iOS app to help children recover from tonsillectomy surgery by providing a recovery timeline
- Featured on the Seattle Times Business Paper front page for this project

Other Projects

- Designed and soldered together a custom theremin controlled Atari Punk analog audio synthesizer
- Created an ethereum based blockchain app using Digital Ocean, NodeJS, JavaScript, solidity, and MySQL
- Programmed a tower defense game from scratch in over 6,000 lines of Python code with custom 2D physics
- Developed several OpenGL particle effect demos and color gamut demos using the bare-bones WebGL API
- Used Python to create a Minecraft server auto-backup client to help server admins recover from griefing
- Created a color palette search site using AWS Lambda, DynamoDB, ReactJS, and the Dribbble.com API

LEADERSHIP/OTHER

BYU Developers Club – President

2015 - 2017 | UT

- Grew club from dormant to 60+ monthly members and 10 leadership members in under one year
- Increased club funding 150x by raising \$30,000+ in donations and starting a resume bank involving 100+ companies

Other

- 1st Place State Science Fair – Computer Science: Rapid Application Development Using Python Scripting
- Opened for Maroon 5 at a private Microsoft concert in front of 2000 people by performing an EDM song on stage
